# Conestoga Valley Homeschoolers

[www.homeschool-life.com/pa/cvhomeschoolers/](http://www.homeschool-life.com/pa/cvhomeschoolers/)

**CV Homeschoolers, a Christian-based, parent-run co-op meets ten weeks from September through November and ten weeks from February through April on Thursday afternoons.**

We offer Nursery and Preschool. Grades K-6 have choir, gym, and an elective each semester. Grades 7 and up have two or three electives each semester with music/choir in the spring. Electives include academic and non-academic classes.

Membership fee includes ALL classes for ALL of your children for both semesters. Some classes may require that you purchase certain books or pay additional fees to cover needed supplies, but we always try to offer a “no-additional cost” class option for every period and age group.

Our parents volunteer to teach the classes and fill helper positions. We rely on parent participation and offer activities that parents are willing to organize and staff. This keeps our costs low and affordable for all family sizes and incomes.

# Learning Station

Our parent-run homeschool co-op meets at Lancaster Evangelical Free Church (LEFC) in Lititz, PA. Elementary classes run for 10 weeks per semester while 7th-12th grade students attend upper level classes for 10-15 weeks per semester.

**Learning Station offers two tracks to membership: co-op track and upper level only track.** Co-op track members teach and serve within Learning Station. This track is required for all families with enrolled elementary-aged children or those with older students who wish to participate in Learning Station's Theater Arts program. Upper level only track registration is open to families with 7th-12th grade students after co-op track students have registered.

**Elementary classes** vary from year to year. Learning Station's members' interests and talents dictate the subjects and topics taught. Our elementary classes are designed to supplement your home curriculum--not replace it. Therefore, most of the work will be done in class. Our upper level classes, however, include "for credit" academic courses as well as "enrichment" options.

*American History 2* will cover from the Civil War until the present day. There will be several projects assigned throughout the year such as a timeline and short research papers, as well as presentations on an innovation that affected America and on one of the US presidents. The students will be encouraged to pursue personal interests in the context of the historical material. Discussions will include talking about how God guided in the history of our nation and how we can be a positive influence in our society.

*American Government* will examine governmental institutions and principles that started to form when we were still British colonies and were formalized when we gained our independence. So, we will talk about the Constitution, the branches of government, how elections work, how the major political parties started, and the influence of money and the media in our political system. These are just a few themes that the class will examine.

*Cultural Geography* will examine governmental institutions and principles that started to form when we were still British colonies and were formalized when we gained our independence. So, we will talk about the Constitution, the branches of government, how elections work, how the major political parties started, and the influence of money and the media in our political system. These are just a few themes that the class will examine.

*Research Writing* will cover several of the forms used for research papers for different types of classes/disciplines, including MLA, APA, CMOS, IEEE, and AMA. The students will find acceptable resources for each type of paper, write one-two pages, and learn how to properly cite using the appropriate style. The students will also be learning how to make annotated bibliographies and how to use other techniques that help people stay organized and be efficient when writing a research paper. Owl.purdue.edu Writing Lab is the main website used by this course to verify details for all of the styles.

*Watercolor Techniques* will explore a variety of ways to use watercolor. We will learn how perspective, lines, and texture can create distance and movement. We will study watercolor artists and use their techniques to create our own paintings. This will be available for those who have never taken it before or those who want to continue from last year's class.

*Intro to Architecture* will provide students with an introduction to architecture. This field includes the application of the principles of form and function to the design of buildings intended for a particular use on a certain piece of land. There will be practice in the use of area standards for the layout of a building interior. There will also be instruction in elements and history of exterior design such as classical architecture and various architectural styles through history. Some of the fields that are part of the complete building design process will be reviewed. Students would need to be comfortable with algebra, geometry, and mechanical drawing or sketching.

Other spring class options include: Creative Writing, Food Chemistry, Ornithology, Fitness 101, & Swing Dance.
